

CORE OFFER SHEET

Manager Core Library
Department of Planning & Environment
WB Clarke Geoscience Centre
947-953 Londonderry Rd, Londonderry NSW
2753 Ph: (02) 4777 7800 Fax: (02) 4777 7893
Email: corelibrary.admin@geoscience.nsw.gov.au

Organisation name (in full)													
Department/branch													
Address City State Postcode													
Contact Name Phone													
Email													
DRILL CORE DETAILS													
Licence/authority ID Project name Title expired? Yes No													
Title being relinquished? Yes No Expiry Date Total core volume trays													
DRILLING PURPOSE (tick all that apply): Metallic 🗌 Non-Metallic 🔲 Coal 🔲 Petroleum 🔲 Stratigraphic 🔲													
Engineering Other Please specify:													
SAMPLE DETAILS (tick all that apply): Diamond Whole Core Split Core Cuttings RAB RC													
Percussion Air Core Other (eg: rocks, assay pulps, auger) Please specify:													
Data associated with accepted drill holes to become open file? Yes \(\square\) No \(\square\)													
Condition of core/samples:													
HAZARDOUS MATERIALS DECLARATION													
HAZARDOOS WATERIALS DECLARATION													
Refer to the Hazardous materials management plans and procedures if the answer to any questions below is yes. Core offered contains radioactive material >2μSv/hour? Yes No													
Refer to the Hazardous materials management plans and procedures if the answer to any questions below is yes.													
Refer to the Hazardous materials management plans and procedures if the answer to any questions below is yes. Core offered contains radioactive material >2 μ Sv/hour? Yes \square No \square													
Refer to the Hazardous materials management plans and procedures if the answer to any questions below is yes. Core offered contains radioactive material >2µSv/hour? Yes \(\bigcap \) No \(\bigcap \) If yes, the measured maximum Contact Dose Rate is \(\bigcap \) \(\bigcap \) \(\bigcap \)													
Refer to the Hazardous materials management plans and procedures if the answer to any questions below is yes. Core offered contains radioactive material >2 μ Sv/hour? Yes \square No \square If yes, the measured maximum Contact Dose Rate is μ Sv/hour at the surface of the core. Core offered contains asbestiform or other fibrous minerals? Yes \square No \square Possibly \square													
Refer to the Hazardous materials management plans and procedures if the answer to any questions below is yes. Core offered contains radioactive material >2µSv/hour? Yes \Boxed No \Boxed If yes, the measured maximum Contact Dose Rate is µSv/hour at the surface of the core. Core offered contains asbestiform or other fibrous minerals? Yes \Boxed No \Boxed Possibly \Boxed Please specify: Core offered contains other hazardous materials? Yes \Boxed No \Boxed If yes, specify:													
Refer to the Hazardous materials management plans and procedures if the answer to any questions below is yes. Core offered contains radioactive material >2µSv/hour? Yes \Boxed No \Boxed If yes, the measured maximum Contact Dose Rate is µSv/hour at the surface of the core. Core offered contains asbestiform or other fibrous minerals? Yes \Boxed No \Boxed Possibly \Boxed Please specify:													
Refer to the Hazardous materials management plans and procedures if the answer to any questions below is yes. Core offered contains radioactive material >2µSv/hour? Yes No If yes, the measured maximum Contact Dose Rate is µSv/hour at the surface of the core. Core offered contains asbestiform or other fibrous minerals? Yes No Possibly Please specify: Core offered contains other hazardous materials? Yes No If yes, specify: PICK UP OR DELIVERY DETAILS Core complies with the Guidelines for acceptable drill core trays, chip samples and specifications for pallets and													
Refer to the Hazardous materials management plans and procedures if the answer to any questions below is yes. Core offered contains radioactive material >2µSv/hour? Yes \Boxed No \Boxed Boxed No \Boxed Possibly \Boxed Pos													
Refer to the Hazardous materials management plans and procedures if the answer to any questions below is yes. Core offered contains radioactive material >2µSv/hour? Yes No If yes, the measured maximum Contact Dose Rate is µSv/hour at the surface of the core. Core offered contains asbestiform or other fibrous minerals? Yes No Possibly Please specify:													
Refer to the Hazardous materials management plans and procedures if the answer to any questions below is yes. Core offered contains radioactive material >2µSv/hour? Yes No Stacking Pallets Access Explain any non-compliance Location of core/samples Superior Superior No Superior Superior No Superior													
Refer to the Hazardous materials management plans and procedures if the answer to any questions below is yes. Core offered contains radioactive material >2µSv/hour? Yes No If yes, the measured maximum Contact Dose Rate is µSv/hour at the surface of the core. Core offered contains asbestiform or other fibrous minerals? Yes No Possibly Please specify:
