July 2013

#### **Disclaimer**

The compilation of information contained in this document relies upon material and data derived from the NSW Trade & Investment COMET database and several third party sources (see Introduction - Sources of Data) and is intended as a guide only. The New South Wales Government does not guarantee that the information is complete, current, reliable and/or free from error and accepts no responsibility for unsuitable or inaccurate material that may be encountered.

All data is subject to continuous improvement due to internal audit and validation processes and updates from external sources. Incorrectly classified information from past years is sometimes found and reclassified in source databases in consultation with Mine Safety Operations. I&I NSW reporting employs the best available data at the time, which may differ from previously published figures. Workforce and lost time injury figures, which are used to produce frequency rates, may include some estimation and cross-referencing to external sources where data is incomplete or unavailable.

Unless otherwise stated, the authorised version of all reports, guides, data and other information should be sourced from official printed versions of the agency directly.

Neither NSW Trade & Investment, the New South Wales Government, nor any employee or agent of I&I NSW, nor any author of or contributor to this document produced by I&I NSW, shall be responsible or liable for any loss, damage, personal injury or death howsoever caused.

Users should always verify material by making and relying upon their own separate enquiries prior to making any important decisions or taking any action on the basis of this information.

## PREFACE

This report summarises the thirteen year data set of Workers Compensation claims from 1999-00 to 2011-12, in the areas of manual handling, falls on the same level and noise induced hearing loss. The report follows on from a report issued in 2011 that presented a 10 year data set to 2008-09.

The report has been prepared for the NSW Mining Industry Health Management Advisory Committee. The Committee provides advice to the NSW Mine Safety Advisory Council on health issues in the NSW mining and extractives industry.

The information is presented for the industry to monitor the selected workers compensation claims occurrence in the industry over time. It is difficult to use the information in the report to identify trends as there are many factors that influence the number and cost of claims.

The environment of reporting workplace workers compensation claims is complex and multi-factorial. To disentangle and quantify different drivers is difficult, if not impossible. The information is only one set of information that can assist in understanding the impact of these illnesses and injuries have on the industry and workers.

The dataset may have been influenced over the 13 year period by new legislation in NSW mining, different initiatives by the Department, Coal Services P/L, WorkCover and industry. WorkCover has also changed the way it treated claims during this period.

## INTRODUCTION

### Sources of Data

#### **Claims Data**

WorkCover NSW (13 February 2013)

WorkCover NSW Disclaimer: Data was correct at the time in which it was extracted, however, it may change due to the progression of data and the application of regular quality reviews.

#### **Hours Worked**

Hours worked used in this report are as reported by NSW Trade & Investment in the NSW Mine Safety Performance Report 2009-10 available from <a href="https://www.dpi.nsw.gov.au/minesafety">www.dpi.nsw.gov.au/minesafety</a>

Data	Mining Sector	Source

### Definitions

#### **Claims Frequency Rate**

The number of claims per million hours worked.

Number of Claims Number of Hours Worked by Employees \* 1,000,000

Note: Hours worked used to calculate frequency rates in this report are for Coal, Metalliferous and Extractives sectors only, as workforce and hours worked cannot be reliably sourced for Non-Coal Other and Petroleum (Onshore) sectors.

#### **Gross Incurred Cost (GIC)**

The sum of payments plus an estimate of future liability if the claim is still open at the end of the current financial year. GIC figures reported in this report are not adjusted for inflation.

#### **Mining Classification**

ANZSIC codes within Mining Industry 1101-1520

- Coal Mining 1101-1102
- Other Mining 1200-1520

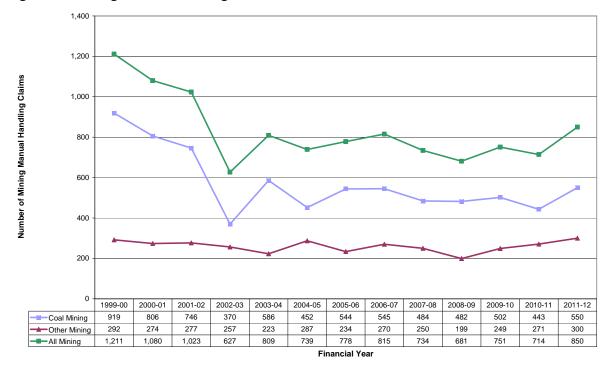

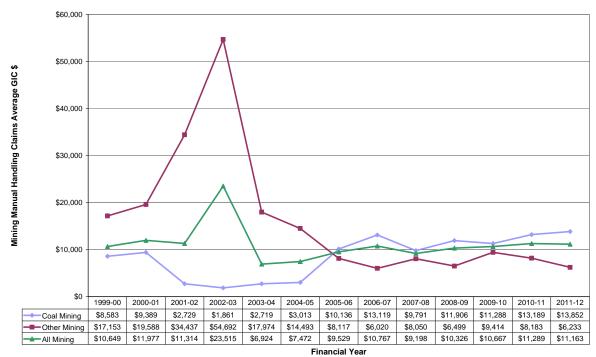

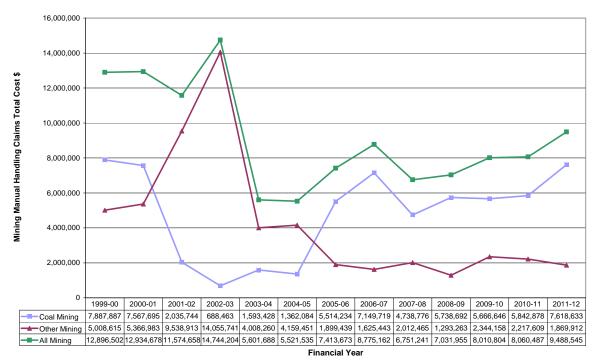

Figure 2 Mining Manual Handling Claims Frequency Rate 1999-00 to 2011-12
